Shivanand Patil

Full-Stack Developer

Bangalore, India | +91 9980875981 | shivanandpatil55550@gmail.com

LinkedIn: SHIVANAND PATIL | GitHub: SHIVANAND PATIL

Professional Summary

Full-Stack Developer with 1.5+ years of experience building responsive, high-performance web applications with React.js, Next.js, and Angular. Experienced in integrating REST APIs with JWT authentication, managing application state with Redux Toolkit and Zustand, and optimizing speed and performance, with version control in Git and GitHub. Delivers user-focused product features in Agile teams across healthcare and real estate platforms.

Skills

Frontend: React.js, Next.js, Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, PrimeNG, Responsive Design

State Management: Redux Toolkit, Zustand, Context API

API Integration: REST APIs, Axios, JWT Authentication, Postman

Performance & Tools: Google Lighthouse, Git, GitHub, Vite, CI/CD, Vercel, Figma, Chrome Extensions (Manifest V3)

Mobile: React Native, Ionic, Capacitor, Expo

Backend, Cloud & AI: Node.js, Express.js, MongoDB, SQL, AWS (S3), Render, Google Gemini LLM, Prompt Engineering

Work Experience

Frontend Developer | Relvix Node-bit Pvt Ltd **July 2026 – Present**

ABDM & HIMS Healthcare Platform | Angular, Ionic, Capacitor, PrimeNG, Spring Boot, SQL

- Architected a unified clinical application, eliminating redundant multi-platform development cycles, by deploying one Angular, Ionic, and Capacitor codebase across web and native medical devices.
- Achieved national compliance for secure patient health data and EHR interoperability, by integrating the ABDM connector with REST APIs on a Spring Boot backend.
- Streamlined real-time patient admission and billing workflows for medical staff, by engineering high-performance PrimeNG UI modules.

Software Developer | Interioverse Design Pvt Ltd **February 2025 – July 2026**

Real Estate Management Platform | Next.js, React.js, JWT, REST APIs, Recharts

- Engineered a scalable Next.js and React.js management system providing real-time data visibility, by centralizing platform operations in reusable frontend modules.
- Secured subscriptions, designer profiles, and dynamic city-wise pricing, by integrating REST APIs with JWT authentication and role-based access.
- Accelerated quotation generation for designers, by building a 3D asset and template catalog module integrated with AWS S3 that replaced manual workflows.
- Delivered actionable insights for administrative decisions, by developing interactive Recharts dashboards tracking weekly and monthly growth and project activity.

Project Management App | React Native, Redux Toolkit, Axios, OTPAuth

- Reduced development time by ~30% across Android and iOS, by building a scalable React Native application on a single codebase.

- Improved application performance and data flow, by architecting global state with Redux Toolkit to resolve prop-drilling bottlenecks.
- Enabled managers to assign role-based tasks and monitor team deliverables, by implementing dynamic task handling with real-time, percentage-based progress tracking.
- Secured protected screens, by integrating OTP-based phone authentication and AsyncStorage for local session management.

Projects

V. 18 Premium Tuition_ Tech-Enabled Learning Platform
React 18, TypeScript, Tailwind CSS

- Architected a high-speed educational portal achieving 95+ Google Lighthouse scores across performance and SEO, by building with React 18, TypeScript, and Tailwind CSS.
- Eliminated backend overhead for contact workflows, by integrating automated EmailJS lead pipelines.

AI-Powered Workday Autofill Extension **Personal Project**
React, Manifest V3, Vite, Google Gemini LLM

- Reduced manual application entry time by 80%, by engineering a production-ready Chrome Extension (Manifest V3) in React that automates multi-step enterprise job applications.
- Mapped candidate data to unknown dropdowns and radio buttons, by integrating the Google Gemini LLM to parse PDF resumes into structured JSON.
- Bypassed strict frontend framework validation, by writing content scripts that simulate human keystrokes and dispatch React synthetic DOM events (input, change, blur).
- Persisted user data across page reloads and tab switches, by designing state management with background service workers and chrome.storage.local.

Smart Kirani Application **Personal Project**
React Native, Expo, Zustand, Node.js, MongoDB

- Digitized day-to-day operations for local grocery (kirana) stores, by developing a cross-platform mobile application with core eCommerce functionality.
- Provided distinct access for customers, shop owners, and delivery personnel, by architecting secure multi-role flows with Expo and Expo Router file-based navigation.
- Avoided prop-drilling and managed product catalog and cart states, by implementing Zustand for lightweight global state management.
- Ensured responsive rendering and persistent sessions on iOS and Android, by using KeyboardAvoidingView, SafeAreaView, and AsyncStorage.

Portfolio Recruiter Chatbot **Personal Project**
Node.js, Express.js, MongoDB Atlas

- Delivered instant information on skills, experience, projects, and contact details to recruiters, by developing a full-stack chatbot with keyword-based response matching and interaction tracking.
- Secured data management, by building REST APIs with Node.js and Express.js integrated with MongoDB Atlas.
- Ensured an optimal experience on desktop and mobile, by designing a responsive UI deployed on Vercel with a production backend on Render.

Education

Bachelor of Engineering in Electronics & Communication (ECE)
Visvesvaraya Technological University, Belagavi | Govt. Engineering College, Haveri
2021 – 2025
